Email Id: deepak.uttarwar01@gmail.com
Address: Pune, India
LinkedIn: https://www.linkedin.com/in/deepak-uttarwar/

Seasoned Program and Delivery Leader with 16+ years of experience driving large-scale digital transformations and technology initiatives across global organizations. Proven expertise in Agile Program Management, particularly SAFe and Lean Agile methodologies, delivering complex programs in cloud modernization, data & analytics, AI/ML, and cybersecurity. Adept at leading multidisciplinary teams of 200+ professionals and managing portfolios exceeding $8M–$12M annually, ensuring robust program governance, stakeholder alignment, and risk management. PMP® and SAFe® 6 Agilist certified, with a strong track record of enhancing operational efficiency and achieving strategic business outcomes.

Executive Portfolio:
https://deepakuttarwar.github.io/

A curated executive portfolio showcasing strategic transformation initiatives, delivery leadership, modernization programs, professional credentials, and selected enterprise-scale engagements.

Professional Summary

- Led enterprise-scale Agile program delivery and technology transformations across cloud, data, AI/ML, and cybersecurity environments for 16+ years.
- Managed annual program portfolios exceeding $8M–$12M, overseeing multidisciplinary teams up to 200+ professionals.
- Championed SAFe, Scrum, and Lean Agile methodologies, improving operational efficiency by 30% through automation and process optimization.
- Established robust AI & Data governance frameworks, MLOps pipelines (Vertex AI, AutoML), and cloud data platform modernization initiatives leveraging Snowflake.
- Directed critical data engineering, infrastructure transformation, and cybersecurity programs, including GDPR compliance for government entities.
- Facilitated executive stakeholder engagement, financial management, comprehensive risk mitigation, and transparent program governance.
- Certified SAFe® 6 Agilist and PMP® with expertise in DevOps, CI/CD, Generative AI, and Retrieval-Augmented Generation (RAG) agentic solutions.

Work Experience

Jul 2026 - Present

Senior Manager

EXL Service

Responsible for driving project delivery within the Agentic Finance Solutions (AFS) practice, supporting the implementation of Agentic AI solutions designed to automate business processes, optimize workflows, and drive operational efficiency for enterprise clients. Overseeing project execution, coordinating cross-functional teams, managing delivery milestones and dependencies, and aligning project outcomes with client business objectives.

- **Agentic AI Initiatives**: Supporting the execution of AI-driven initiatives focused on business process automation, intelligent workflows, and operational transformation for enterprise clients.
- **AI-Enabled Process Transformation**: Working with cross-functional teams to support the implementation of Agentic AI solutions that streamline business processes and reduce manual intervention.
- **Project Execution & Delivery**: Driving project activities, coordinating dependencies, tracking milestones, and facilitating collaboration across business and technology teams to support timely delivery.
- **Stakeholder Collaboration**: Engaging with relevant stakeholders to align project priorities, manage delivery dependencies, address issues, and maintain

Jul 2022 - Jul 2026

Senior Manager - Program & Delivery

KPIT Technologies (Pune)

Lead enterprise program delivery and transformation initiatives across software engineering, cloud, data, AI/ML and technology modernization environments. Own end-to-end delivery governance, executive stakeholder engagement, financial management, resource planning, risk management and operational performance across multiple concurrent programs.

- Own end-to-end delivery governance across multiple enterprise programs with annual portfolio value exceeding $8M–$12M.
- Lead cross-functional delivery teams across engineering, architecture, program management, data, cloud, AI/ML and cybersecurity functions.
- Develop and manage program plans covering milestones, deliverables, dependencies, risks, issues, escalations, resources and governance checkpoints.
- Coordinate cross-functional activities to support delivery readiness, stakeholder alignment, implementation planning and production handover.
- Establish AI and Data governance frameworks, including delivery operating models, data quality controls, lifecycle governance and compliance monitoring.
- Lead AI/ML platform deployments using MLOps pipelines, automated model validation, performance monitoring and production handover processes.
- Direct enterprise data engineering initiatives covering data ingestion, migration strategy, cloud data platform modernization and analytics enablement.
- Collaborate with architecture teams on enterprise data governance, metadata management and scalable cloud-native data platforms.
- Manage executive governance reviews using RAID dashboards, KPI reporting, forecasting models and value realization tracking.
- Lead steering committee meetings, executive stakeholder reviews, customer discussions and escalation management.
- Track and manage program risks, dependencies, issues and corrective actions to maintain delivery momentum.
- Improved operational efficiency by 30% through automation, governance standardization and process optimization.
- Champion Agile, Scrum, SAFe, Hybrid PMO, DevOps, AI/ML and cloud transformation initiatives.
- Collaborate with Sales, Product Management and Leadership teams on solutioning, implementation feasibility and business growth initiatives.
- Optimize resource utilization through process improvements and automation, reducing delivery overhead.
- Mentor delivery teams in modern Agile, DevOps, cloud engineering and AI/ML practices.
- Strengthen cross-functional collaboration and delivery predictability through structured governance and transparent communication.

Achievements:

- Managed an annual program portfolio with a value exceeding $8M–$12M, ensuring strategic alignment and maximized return on investment.
- Improved operational efficiency by 30% through the strategic implementation of automation, governance standardization, and process optimization initiatives.

Sep 2019 - Jul 2022

Senior Project Manager

Coforge-Client: UBS (Pune)

Led enterprise technology, regulatory reporting, cybersecurity and controls automation programs for a global financial-services client, managing scope, schedule, budget, resources, governance, compliance and customer stakeholders.

- Led end-to-end delivery of a regulatory reporting and controls automation program, managing scope, schedule, budget, resources and project governance.
- Partnered with Finance, Risk, Compliance and Technology stakeholders to define requirements, prioritize deliverables and drive execution.
- Managed project financials including budgeting, forecasting, resource planning and actual-versus-approved-spend tracking.
- Managed GRC activities including risk assessments, audits and policy alignment with regulatory and customer requirements.
- Coordinated project execution and compliance activities across cybersecurity and technology operations.
- Facilitated Scrum ceremonies and cross-functional collaboration to support timely software delivery.
- Managed and delivered software development programs using Agile methodologies while maintaining schedule and quality objectives.
- Led end-to-end delivery of cybersecurity services, including onboarding, execution and continuous service optimization across enterprise clients.

enterprise clients.
- Acted as central point of accountability across internal teams, partners and customer stakeholders.
- Managed critical project escalations using structured issue resolution, risk mitigation and corrective-action processes.
- Strengthened stakeholder confidence through proactive communication, governance and transparent delivery reporting.
- Reduced delivery disruptions through structured escalation management and risk mitigation frameworks.

Achievements:
- Reduced delivery disruptions through the implementation of structured escalation management and comprehensive risk mitigation frameworks.
- Enhanced stakeholder confidence and transparency through proactive communication, robust governance, and clear delivery reporting.

Mar 2018 - Aug 2019

Manager

Vodafone Shared Services

- Directed comprehensive GDPR compliance initiatives and cybersecurity operations for shared services, providing strategic oversight for data protection.
- Managed a Java-based GDPR compliance project, integrating regulatory requirements into software development lifecycles (GDPR-Permission - Transparency).
- Optimized solution design and development efforts through comprehensive business process analysis and active requirement gathering.
- Elevated application security by conducting code reviews for SOLID design principles and leading vulnerability assessments (VAPT/AppSec) with subsequent remediation.
- Collaborated with Identity and Access Management (IAM) teams to align access governance, privilege management, and identity lifecycle processes with delivery objectives.
- Implemented proactive threat hunting strategies to identify and mitigate potential security threats, enhancing organizational data integrity and confidentiality.

Achievements:
- Significantly enhanced data privacy and protection through the implementation of GDPR-aligned policies and procedures across the shared services organization.
- Strengthened overall application security posture by guiding remediation efforts post VAPT/AppSec and enforcing robust design principles.

Oct 2016 - Dec 2017

Lead Administrator

Wipro Technologies

- Functioned as a Global Subject Matter Expert (SME) for Symantec security products within a Security Operations Center (SOC) environment.
- Managed day-to-day network security operations, ensuring the confidentiality, integrity, and availability of critical systems and data.
- Conducted advanced threat intelligence analysis to identify and mitigate potential security incidents and emerging risks.
- Supported incident investigations, malware analysis, and threat assessments by correlating alerts and analyzing attack patterns to guide response teams effectively.
- Collaborated with SOC analysts and stakeholders to optimize security controls and enhance the overall incident response effectiveness.

Achievements:
- Strengthened organizational security posture through proactive measures and rigorous threat intelligence analysis.
- Maintained stable and secure network operations, effectively protecting critical data assets.

Sep 2015 - Oct 2016

Senior Technical Consultant

Fujitsu Consulting India

- Provided technical consulting expertise to address complex business problems and enhance client software operations.
- Collaborated with cross-functional teams to contribute to the successful design and delivery of tailored technical solutions.
- Resolved intricate technical challenges through expert analysis, improving operational efficiency for client systems.
- Supported incident investigations and conducted malware analysis, offering technical guidance during containment, eradication, and recovery phases.

Achievements:
- Enhanced client software operations through expert technical problem-solving and strategic solution delivery.
- Contributed to improved operational efficiency by resolving complex technical challenges across various projects.

Aug 2010 - Sep 2015

Advance Line Engineer

Symantec Corporation

- Provided advanced-level technical support for Symantec security products to enterprise clients, resolving complex and critical system issues.
- Documented standard operating procedures (SOPs) and established best practices, enhancing knowledge sharing and operational consistency.
- Managed technical escalations, collaborating closely with engineering and product teams to facilitate timely resolution of customer-impacting issues.

Achievements:

- Enabled faster resolution of critical customer problems by acting as a liaison between clients and product development teams.
- Cultivated deep expertise in Symantec security products and complex enterprise environments, improving troubleshooting effectiveness for diverse technical challenges.

Education

Master of Computer Application (MCA)
D.Y. Patil Institute of Management, Pune University, Pune, Maharashtra, India
(2009)

Bachelor of Computer Applications (BCA)
ITM College, Nanded, SRTMU, Nanded, Maharashtra, India
(2006)

Certifications

- **Certified SAFe® 6 Agilist** (Scaled Agile, Inc. - 2025)
- **Project Management Professional (PMP)®** (Project Management Institute - 2022)
- **Microsoft Certified: Azure Security Engineer Associate** (Microsoft - 2021)

Projects

Android-Based Infotainment System for Next-Gen Vehicle

- Led full-stack development and delivery of an Android Automotive OS-based infotainment system for a flagship electric vehicle platform, enhancing customer experience and user engagement.
- Facilitated consistent project momentum through daily coordination with vendor leads and TML stakeholders, ensuring rapid roadblock resolution.
- Optimized team efficiency by establishing process flexibility agreements with Internal QA and PMO, streamlining processes and reducing overhead.
- Directed timely project releases and delivery under high-pressure conditions, effectively managing external project dependencies.
- Cultivated a high-performance team culture through proactive morale initiatives and advocating for feasible workloads and adaptable compliance frameworks.
- Accelerated incremental value delivery and expedited adaptation to evolving requirements by championing feature-based project deliveries.
- Established continuous communication channels for critical project risks, maintaining transparency and alignment among leadership and vendors.
- Implemented AI operational dashboards for tracking model performance metrics, business KPIs, and demonstrating value realization outcomes.

Predictive Maintenance Dashboard

- Implemented a comprehensive predictive maintenance solution to optimize service intervals for critical vehicle components.
- Streamlined data processing by gathering and refining sensor data (e.g., brake pressure, temperature, clutch engagement cycles, mileage) utilizing Cloud PubSub and storing data in BigQuery.
- Enhanced precision in Remaining Useful Life (RUL) predictions through the development of RUL models, leveraging Vertex AI Training and AutoML with key features like time-series and wear patterns, validated using MAE and RMSE metrics.
- Designed an end-to-end MLOps framework supporting model training, deployment, monitoring, drift detection, and robust governance.
- Established model validation processes and performance assessment frameworks, ensuring production readiness for predictive models.
- Implemented data quality monitoring and governance controls across all ingestion, transformation, and analytics pipelines.

Digital Transformation - Asset Management Platform Portal

- Designed, developed, and managed the implementation of a Fleet Management System, significantly enhancing safety and operational efficiency of vehicle assets.
- Engineered a comprehensive system for improved vehicle monitoring, including health prediction, range forecasting, and proactive assessment of driver tendencies and behavior.
- Integrated geo-fencing capabilities and dynamic location tracking for active management of assets.
- Managed development and data storage, elevating data integrity and operational scalability by strategically leveraging Snowflake Data Warehouse.
- Drove digital transformation of asset management operations for a commercial vehicle company in the United States, utilizing innovative and emergent technologies to improve efficiency.

Integrated Banking Solutions Platform

- Designed and implemented a secure, cohesive banking platform, integrating Business, Commercial, and Gross Banking services to revolutionize financial service delivery.
- Engineered streamlined operational efficiencies and significantly improved client experiences through seamless and unified service functionality.
- Ensured platform adherence to all regulatory and industry standards, mitigating legal exposure and preserving customer confidence.

GDPR Compliance Implementation for a Southern Europe Country

- Directed a comprehensive GDPR compliance project for a Southern European government entity, enhancing organizational data privacy and regulatory alignment.
- Designed and executed an extensive end-to-end audit of national data processing operations, identifying critical compliance gaps and prioritizing high-risk remediation actions.
- Engineered and implemented GDPR-compliant policies, operational frameworks, and control mechanisms, significantly elevating security standards and mitigating data breach exposure.
- Collaborated with diverse government teams to translate complex regulatory requirements into actionable technology solutions, ensuring adherence to evolving EU data protection standards across systems and integrations.
- Developed and operationalized a continuous compliance monitoring framework, facilitating ongoing risk assessment, dynamic response to regulatory changes, and measurable enhancements in data security posture.
- Trained client teams through knowledge transfer sessions and comprehensive process documentation, establishing sustainable compliance practices and ensuring audit readiness.
