

DEEPAK UTTARWAR

Senior Manager – Program & Delivery

Phone No: +91-9545660005

Email Id: deepak.uttarwar01@gmail.com

Address: Pune, India

LinkedIn: <https://www.linkedin.com/in/deepak-uttarwar/>

Program, Delivery & Transformation Leader with 16+ years of experience leading enterprise-scale Automotive, Digital Engineering, Data & Analytics, AI/ML, Cloud Modernization, Software and Technology Transformation initiatives across global organizations. Proven success in governing multimillion-dollar portfolios, modernizing technology platforms, establishing scalable operating models, and delivering complex transformation programs that accelerate business value, operational efficiency, and customer outcomes. Trusted by executive stakeholders to navigate ambiguity, solve critical business challenges, and translate strategic vision into measurable business results.

PMP® and SAgE® Certified with a strong track record of delivering strategic programs, enabling modernization, and creating measurable business value.

Executive Portfolio:

<https://deepakuttarwar.github.io/>

A curated executive portfolio showcasing strategic transformation initiatives, delivery leadership, modernization programs, professional credentials, and selected enterprise-scale engagements.

Professional Summary

- Accomplished Program and Delivery Executive with a strong track record of governing large-scale transformation initiatives across Generative AI, Agentic AI, Data & Analytics, AI/ML Platforms, Cloud Modernization, Digital Engineering, and Cybersecurity domains.
- Experienced in leading strategic portfolios, enterprise programs, and global delivery organizations, ensuring alignment between business objectives, technology investments, and customer outcomes.
- Proven expertise in delivery governance, portfolio management, financial oversight, resource optimization, risk management, compliance, and value realization across complex enterprise environments.
- Successfully enabled enterprise modernization through cloud-native platforms, data engineering ecosystems, AI/ML solutions, MLOps frameworks, intelligent automation, and digital transformation initiatives.
- Trusted advisor to executive stakeholders, driving decision-making through KPI-based governance, operational transparency, forecasting, and outcome-driven execution models.
- Recognized for building scalable operating models, strengthening delivery predictability, accelerating transformation programs, and consistently delivering measurable business value.

DELIVERY EXCELLENCE HIGHLIGHTS:

- Governed and delivered 70+ enterprise projects and transformation programs while managing portfolios comprising up to 20 concurrent initiatives across global delivery organizations.
- Managed multimillion-dollar portfolios exceeding \$8M–\$12M annually with accountability for financial governance, forecasting, resource planning, delivery performance, and customer success.
- Improved operational efficiency by over 30% through governance standardization, process optimization, automation initiatives, and continuous improvement practices.
- Reduced critical delivery escalations by 30% through proactive risk mitigation, executive stakeholder engagement, structured governance frameworks, and effective decision-making mechanisms.
- Led large-scale transformation initiatives involving AI/ML Platforms, MLOps, Data Engineering, Cloud Modernization, Digital Engineering, and Cybersecurity programs, enabling scalable and future-ready technology ecosystems.
- Directed multidisciplinary teams of 200+ professionals across engineering, architecture, program management, data, cloud, AI/ML, and cybersecurity functions, ensuring predictable execution and high-quality delivery outcomes.

Soft Skills

Strategic Thinking

•Delivered high customer satisfaction and long-term partnerships through strategic, outcome-focused leadership.

Work Experience

Jul 2022 - Present

Senior Manager - Program & Delivery

KPIT Technologies

Oversaw program delivery and spearheaded innovation for a software and engineering services company; cultivated a consultative mindset within delivery teams; promoted a culture of experimentation, continuous learning, and technical excellence; fostered a collaborative and ownership-driven environment that encouraged innovation and accountability.

- Own end-to-end delivery governance across multiple enterprise programs with annual portfolio value exceeding \$8M-\$12M.
- Established AI & Data governance frameworks including delivery operating models, data quality controls, model lifecycle governance, and compliance monitoring.
- Led AI/ML platform deployments leveraging MLOps pipelines, automated model validation, performance monitoring, and production handover processes.
- Directed enterprise data engineering initiatives including data ingestion frameworks, data migration strategy, cloud data platform modernization, and analytics enablement.
- Managed executive governance reviews utilizing RAID dashboards, KPI reporting, forecasting models, and value realization tracking.
- Collaborated with architecture teams on enterprise data governance strategy, metadata management, and scalable cloud-native data platforms.
- Led executive-level stakeholder engagement, steering committee reviews, and escalation management activities.
- Improved operational efficiency by 30% through automation, governance standardization, and process optimization.
- Championed Agile, Scrum, SAgile, Hybrid PMO, DevOps, AI/ML, and cloud transformation initiatives.
- Collaborated with Sales, Product Management, and Leadership teams on solutioning, implementation feasibility, and business growth initiatives.

Achievements:

- Optimized resource utilization through introducing process enhancements and automation to enhance operational efficiency and reduce delivery overhead.
- Enhanced team capabilities and project outcomes by Guiding teams in adopting modern delivery practices like Agile, DevOps, cloud engineering, and AI/ML integration.
- Increased cross-functional effectiveness by mentoring and enabling high-performing teams, maximizing team performance and promoting knowledge sharing.

Sep 2019 - Jul 2022

Senior Project Manager

Coforge-Client: UBS

Orchestrated project execution and ensured cybersecurity operations; provided leadership in project management intricacies and agile methodologies; Built and nurtured strong client relationships by combining technical cybersecurity expertise with a deep understanding of business priorities.

- Led end-to-end delivery of a regulatory reporting and controls automation project, managing scope, schedule, budget, resources, and project governance.
- Partnered with Finance, Risk, Compliance, and Technology stakeholders to define requirements, prioritize deliverables, and drive successful execution.
- Managed project financials, including budgeting, forecasting, resource planning, and tracking actuals against approved spend.
- Managed GRC activities including risk assessments, audits, and policy alignment to meet regulatory and customer requirements.
- Orchestrated project execution and ensured adherence to Control Compliance Suite for a UBS, maintaining a robust security posture.
- Facilitated effective collaboration and timely delivery of software development projects through orchestrating Scrum ceremonies.
- Enhanced overall Compliance posture through implementing Symantec CCS measures, ensuring compliance of organizational assets and mitigating potential risks.
- Managed and delivered software development projects using Agile methodologies, ensuring adherence to project timelines and quality standards.

Executive Communication
Decision Making
Negotiation & Conflict Resolution
Customer Relationship Management
Change Leadership
Cross-Functional Collaboration
Problem Solving & Critical Thinking
Constructive Dissent

Core Competencies

Enterprise Transformation Leadership
Strategic Program Delivery
Delivery Excellence
Financial Governance
P&L Ownership
Executive Stakeholder Management
Resource Planning & Optimization
Communication & Presentation Skills
Operational Excellence
Risk Management & Risk Mitigation
Governance & Compliance

- Led end-to-end delivery of cybersecurity services, ensuring smooth onboarding, execution, and continuous service optimization across enterprise clients.
- Acted as the central point of accountability for security engagements, aligning internal teams, partners, and customer stakeholders to deliver consistent outcomes.

Achievements:

- Strengthened stakeholder trust and engagement through consistent delivery, proactive communication, and effective governance practices.
- Reduced delivery disruptions by implementing structured escalation management and risk mitigation frameworks.
- Effectively managed critical project escalations, driving structured issue resolution, risk mitigation, and corrective actions while maintaining stakeholder confidence and delivery momentum.

Mar 2018 - Aug 2019

Manager

Vodafone Shared Services

Managed GDPR compliance initiatives and cybersecurity operations; demonstrated a deep understanding of business processes; conducted code reviews, and led design implementation.

- Managed GDPR compliance initiatives and cybersecurity operations for shared services, ensuring comprehensive coverage and providing strategic direction.
- Shared responsibility for GDPR-Permission - Transparency (Java Project) and Cybersecurity Operations, ensuring comprehensive data protection.
- Demonstrated a deep understanding of business processes for enhancements and actively gathered requirements, optimizing solution design.
- Conducted code reviews, provided guidance on maintaining SOLID design principles, and ensured code integrity.
- Worked closely with IAM teams to understand access governance, privilege management, and identity lifecycle processes from a delivery standpoint.
- Proactively conducted threat hunting to identify and mitigate potential security threats, ensuring the integrity and confidentiality of organizational data.
- Led application security assessments (VAPT/AppSec) and guided remediation to strengthen application risk posture.

Achievements:

- Enhanced data privacy and protection by implementing GDPR-aligned policies and procedures.
- Improved application security by ensuring SOLID design principles through guidance and code review.
- Strengthened organizational data integrity and confidentiality through diligent threat hunting activities.

Oct 2016 - Dec 2017

Lead Administrator

Wipro Technologies

Served as a Global SME for Symantec security products, providing advanced threat intelligence analysis within a SOC environment. Actively supported incident investigations, malware analysis, and threat assessment by correlating alerts, analyzing attack patterns, and guiding response teams. Collaborated closely with SOC analysts and stakeholders to improve threat detection accuracy, optimize security controls, and strengthen overall incident response effectiveness.

- Provided advanced threat intelligence analysis within a Security Operations Center (SOC) to identify and mitigate potential security incidents.
- Managed day-to-day network security operations, ensuring confidentiality, integrity, and availability of critical systems and data.

Achievements:

- Enhanced organizational security by identifying and mitigating emerging security risks through rigorous threat intelligence analysis.
- Maintained stable network security operations through proactive measures protecting critical data.

Sep 2015 - Oct 2016

Senior Technical Consultant

Fujitsu Consulting India

Delivered consulting as a technical expert to address complex business problems and enhance software operations.

- Delivered technical expertise to address complex business problems, enhancing software operations for clients.
- Provided consulting services as a technical expert to address complex business problems, enhancing software operations.

Achievements:

- Contributed to the successful design and delivery of solutions through collaboration with cross-functional teams with team members expertise.
- Resolved intricate technical challenges, thus providing efficiency for operations.

- Actively supported incident investigations and malware analysis, providing technical guidance during containment, eradication, and recovery phases.

Aug 2010 – Sep 2015

Advance Line Engineer

Symantec Corporation

Offered Advance-level technical support related to security products.

- Provided high-level technical support for Symantec security products to enterprise clients, resolving complex issues.
- Documented standard operating procedures and best practices.

Achievements:

- Played a key role in escalation management with engineering and product teams, enabling faster fixes for critical customer-impacting issues.
- Rapidly learned and mastered Symantec security products and enterprise environments, enabling effective troubleshooting of complex issues.

Education

Master of Computer Application (MCA)

D.Y. Patil Institute of Management, Pune University, Sant Tukaram Nagar, Pimpri, Pune - 411018, Maharashtra, India.
(2009)

Bachelor of Computer Applications (BCA)

ITM College, Nanded, SRTMU, Nanded, VIP Rd, Vishnu Nagar, Nanded-Waghala, Maharashtra 431602
(2006)

Certifications

- **Certified SAFe® 6 Agilist** (SAFe by Scaled Agile, Inc. - 2025)
- **Project Management Professional (PMP)®** (Project Management Institute - 2022)
- **Microsoft Certified: Azure Security Engineer Associate** (Microsoft - 2021)

Projects

Android-Based Infotainment System for Next-Gen Vehicle

- Android-Based Infotainment System for Next-Gen Vehicle: Drove the full-stack development of an Android Automotive OS-based infotainment system for a flagship electric vehicle platform to modernize the customer experience and increase user engagement.
- Facilitated consistent project momentum by driving everyday coordination with vendor leads and TML stakeholders to rapidly resolve roadblocks.
- Streamlined team efficiency by securing process flexibility agreements with Internal QA and PMO, to efficiently improve processes and eliminate inefficient overhead.
- Managed timely project releases and delivery in time sensitive (high-pressure) conditions, effectively managing external project dependencies.
- Fostered a high-performance team through proactive morale initiatives, promotion of feasible workloads, and critical review of inflexible, impractical compliance rules.
- Accelerated delivery of incremental value to the customer and successfully adapted to shifting needs by Championing feature-based project deliveries.
- Established continuous communication of crucial project-related risks and maintained project responsibility on all parties through project transparency and alignment with leadership across vendors.

Predictive Maintenance Dashboard

- Predictive Maintenance Dashboard: Implemented a comprehensive predictive maintenance solution to optimize service intervals for critical vehicle components.
- Streamlined Data Processing by gathering and refining sensor data, including brake pressure, temperature, clutch engagement cycles and mileage (utilizing Cloud PubSub) and storing data in BigQuery.
- Enhanced precision in Remaining Useful Life (RUL) predictions by developing RUL prediction models (utilizing Vertex AI Training and AutoML) with key features (time-series and wear patterns) and validated using MAE and RMSE metrics.
- Designed end-to-end MLOps framework supporting model training, deployment, monitoring, drift detection, and governance.
- Implemented model validation processes and performance assessment frameworks ensuring production readiness.
- Established data quality monitoring and governance controls across ingestion, transformation, and analytics pipelines.

- Delivered AI operational dashboards tracking model performance metrics, business KPIs, and value realization outcomes.

Digital Transformation – Asset Management Platform Portal

- Digital Transformation – Asset Management Platform Portal: Designed, developed, and managed the implementation of a Fleet Management System that enhanced safety and operational efficiency of vehicle assets.
- Improved Vehicle Monitoring: Created system capable of monitoring vehicle health and predicting vehicle range and proactively assessing driver tendencies and behavior.
- Implemented geo-fencing and implemented dynamic location tracking of assets.
- Managed the development and data storage, improved data integrity, and enhanced operational scalability by leveraging Snowflake Data Warehouse as the key service utilized for this project.
- Transformed system and greatly improved efficiency of asset management operations for a commercial vehicle company in the United States using innovative, emergent technologies.

Integrated Banking Solutions Platform

- Integrated Banking Solutions Platform: Designed and implemented a secure, cohesive banking platform and revolutionized financial service delivery by integrating Banking Services (Business, Commercial, and Gross Banking).
- Engineered streamlined operational efficiencies and vastly improved client experiences by providing customers seamless and unified service functionality.
- Reduced legal exposure and preserved customer confidence through the creation of a platform that upheld all regulatory standards and industry standards.

GDPR Compliance Implementation for a Southern Europe Country

- Led GDPR compliance project for a Southern Europe country government entity, strengthening organizational data privacy and regulatory alignment.
- Designed and executed a comprehensive end-to-end audit of national data processing operations, identifying critical gaps in compliance and prioritizing high-risk areas for remediation.
- Engineered and implemented GDPR-compliant policies, operational frameworks, and control mechanisms, significantly elevating security standards and reducing exposure to data breaches.
- Collaborated with cross-functional government teams to translate regulatory requirements into actionable technology solutions, ensuring systems, processes, and third-party integrations adhered to evolving EU regulations.
- Developed and operationalized a continuous compliance monitoring framework, enabling ongoing risk assessment, timely response to regulatory changes, and measurable improvement in data security posture.
- Trained and empowered client teams with knowledge transfer sessions and process documentation, establishing sustainable compliance practices and maintaining audit readiness.
- Drove measurable reductions in data compliance risk, enabling successful external audits, securing critical government data, and enhancing public trust in digital services.
